Animal Care

Enthusiastic former veterinary technician looking to get back to the equine industry and to find a career in which to excel in. Eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Clear understanding of the importance of consistency and adaptability. Motivated to learn, grow and excel in the equine industry.

Work History

Mar 2020-
Current

Content Design Specialist

Lockton Companies

Jan 2019-
March 2020

Veterinary Technician

Wilhite & Frees Equine Hospital

- Paired up with a vet to drive them to appointments and keep their truck clean and fully stocked after appointments
- Handled, lunged, and restrained horses to ensure the vet could perform any examinations and procedures safely and effectively
- Set up equipment and supplies for appointments based on the client's needs and requests
- Gave medications (oral, topical, intravenous, and intramuscular)
- Kept constant lines of communications between veterinarian and client to ensure all needs and expectations of the appointment are being met.

May 2018-
Jan 2019

Vet Assistant/Kennel Attendant

Kansas City Veterinary Care

- Assisted veterinarians and veterinary technicians by restraining and monitoring animals during procedures
- Gave animals medications such as vaccines, ear solution, and various oral medications
- Stocked treatment areas and exam rooms throughout the day to ensure appointments continued smoothly and did not get behind
- Ran lab work such as SNAP heartworm tests, setting up fecals, running urine and bloodwork, and filling prescriptions
- Acted as shift leader to ensure tasks get done efficiently and properly
- Met face-to-face with clients during drop offs and pickups

May 2016-
Aug 2016

Equine Rehabilitation Intern

Days End Farm Horse Rescue

- Cared for 60+ horses including minis, foals, and donkeys who came from all different kinds of abusive backgrounds and were in various physical states and body conditions
- Gave medications and rehab treatments such as soaking and bandaging as set forth by the equine health director
- Kept a quarantined area for newly impounded equines
- Provided farm tours to potential donators

Education

2018

Bachelor of Science: Agricultural Business, Equine Science

Truman State University - Kirksville, MO
